

Golden Spike Targets

There are many targets located at the Golden Spike Range. Most of them are visible from the firing line. All of our targets are made of steel. Some are thicker than others, and some are made of armor plate. The following is a classification of what you can shoot at and with what kind of firearm, and load.

Please remember that if you see a target that is not shown below, don't shoot at it until you get clearance from either Peter or Denny.

Pistol Caliber Targets

The array of pistol targets can be shot at with any shotgun (#6 shot and smaller), handgun or rifle in a pistol caliber. All targets are to the left of the main firing line and are under 100 Yards.

Black Powder Cartridge Targets

These targets are intended for **Cast Bullets Only!** Any rifle shooting cast bullets propelled by either smokeless or black powder are approved for these targets.
